

# Business Accounting Services

Our CPAs are leaders in business accounting services, with experience working for Fortune 500 companies as well as business organizational tax structuring, managerial accounting and tax compliance on both federal and state levels. We provide our clients the guidance executive teams offer at a fraction of the cost. By having tax and accounting oversight, we alleviate the lost tax savings opportunities that often arise when these two most important functions of your business are not in sync. With all your accounting and reporting needs met by Fisher, P.A., you are well informed of your business financial position – without the additional costs of HR and IT requirements you would have by hiring in-house.

We offer three levels of monthly accounting services to cater to the needs of a small business startup to the needs of an established middle market company. These services are customized to meet the requirements of the business by industry, ownership and financial plans.

- Outsourced Accounting
- Outsourced Controller
- Outsourced Chief Financial Officer

**Start service immediately. Monthly flat rate pricing. No long-term contracts required. You can cancel anytime with a 30-day notice. Prior accounting records can be completed and corrected as needed.**
